Expedition:LEARN!

Earth Science

Earth's Spheres
How Do Fossil Fuels Form?
Interactions of Earth's Spheres
Minerals and Their Properties
Natural Hazards
Nonrenewable Energy Resources
Patterns of Daily Change
Patterns of Earth's Features
Protecting Earth
Recycling
Renewable Energy Resources
Seasonal Changes in Stars
Seasons and Weather
Soil and How It Is Formed
The Phases of the Moon
The Planets
The Sun
Understanding Earth's Changes
Understanding the Water Cycle
Weather Data in Tables and Graphs
Weather-Related Hazards
Weathering and Erosion
What Are Asteroids?
What Are Comets?
What Are Moons?
What Is Climate?
What Is Weather?
Where Is Earth's Water Found?

ETS (Engineering)

What Is the Design Process?

Life Science

Animal Habitats
Animal Responses
Animal Senses
Animal Structures
Changes in the Environment
Comparing Vertebrates and Invertebrates
Desert Habitats
Energy in Food
Extinct Plants and Animals
Flowering and Nonflowering Plants
Food Chains and Food Webs
Forest Habitats
Fossils and Evidence of Life
Freshwater Habitats
Grassland Habitats
Group Behavior
Hibernation and Migration
How Humans Change Environments
Life Cycles of Animals
Life Cycles of Flowering Plants
Marsh Habitats
Materials for Plant Growth
Ocean Habitats
Plant Responses
Plant Structures
Producers, Consumers, and Decomposers
Rainforest Habitats
Structure and Function of Flowers
Survival and Differences Among Organisms
The Brain
The Heart
The Lungs
The Skin
The Stomach
Traits and the Environment
Tundra Habitats

Types of Fossils and How They Form
What Are Adaptations?
What Are Amphibians?
What Are Arthropods?
What Are Birds?
What Are Fish?
What Are Mammals?
What Are Reptiles?
What Is a Trait?

Physical Science

Balanced and Unbalanced Forces
Conductors and Insulators
Conservation of Matter
Designing a Device That Converts Energy
Electric Currents and Circuits
Energy and Colliding Objects
Energy Conversions
Energy Transfer
Gravitational Force
Heat
Mass and Weight
Patterns of Motion
Patterns Transfer Information
Properties of Matter
Sound Energy
Speed and Energy
States of Matter
Using Magnets to Solve Problems
What Are Chemical Reactions?
What Are Electric and Magnetic Interactions?
What Are Forces?
What Are Mixtures and Solutions?
What Are Waves?
What Is Friction?
What Is Light?
What Is Matter?
What Is Mechanical Energy?

Scope & Sequence

SCIENCE • Middle School (Gr. 6–8)

Britannica
Expedition:LEARN!

Earth Science

Air Masses and Weather
Asteroids
Characteristics of the Sun
Climate Change
Comets
Comparing Stars
Desertification
Earth System and Subsystems
Earth's Atmosphere-Structure and Components
Eclipses
Historical Models of the Solar System
How Human Activity Influences Watersheds
Introduction to Climate
Introduction to Natural Hazards
Lunar Phases
Measuring Distances in Space
Monitoring and Minimizing Human Impact
Moons
Motion in Space
Natural Resources
Newton's Third Law
Organization of Ecosystems
Patterns in the Fossil Record
Plate Movements
Seasons
Technology for Observing and Exploring Space
The Geologic Time Scale
The Layers of Earth
The Rock Cycle
The Solar System
The Water Cycle
Volcanoes

Weathering and Other Changes to Earth's Surface
What Are Galaxies?
What Are Glaciers?
What Causes Tides?
What Conditions Allow Life on Earth?
What Is Radioactive Dating?

ETS (Engineering)

Engineering and the Design Process

Life Science

Animal Behaviors Affecting Reproduction
Biodiversity
Cells
Cellular Respiration
Classifying Living Things
Comparing Meiosis and Mitosis
Comparing Prokaryotes and Eukaryotes
Cycles of Matter: Carbon
Ecosystems: Impacts of Change
Genes, Chromosomes, and Traits
Growth of Organisms
Human Impacts on Earth's Systems
Humans Influence Inheritance of traits
Infectious Agents: Bacteria
Infectious Agents: Fungi
Infectious Agents: Parasites
Infectious Agents: Viruses

Materials in Food Are Used for Growth
Matter and Energy in Food Webs
Mutations
Natural Selection
Parts of a Cell
Patterns in Development
Plant Reproduction
Predators and Prey
Primary and Secondary Succession
Punnett Squares and Pedigrees
Reproduction
Resources in Ecosystems
Sensing Information
The Human Circulatory System
The Human Endocrine System
The Human Excretory System
The Human Immune System
The Human Muscular System
The Human Nervous System
The Human Respiratory System
Thermal Energy Transfer
Understanding Adaptation

Physical Science

Changes in Kinetic Energy
Chemical Changes Affect Properties
Chemical Reactions
Chemical Reactions and Energy
Chemical Symbols and Formulas
Comparing Mass and Weight

Comparing Properties of Matter
Conservation of Matter in Chemical Reactions
Digital and Analog Signals
Electric and Magnetic Forces
Elements and Compounds
Energy and Temperature Change
Energy Transformation
Fields and Forces
Forces and Motion
Graphing Motion (Distance versus Time Graphs)
Gravitational Interactions
Identifying Types of Elements
Inferring Evolutionary Relationships
Interactions in Ecosystems
Kinetic Energy
Light
Organization of the Human Body
Photosynthesis
Potential Energy
Structure of Matter
Substances, Heterogenous Mixtures, and Solutions
Synthetic Materials
The Electromagnetic Spectrum
The Properties of Water
The Structure of Atoms
Thermal Energy and States of Matter
Using the Periodic Table
Wave Properties
What Are Acids and Bases?

Civics & Government

Citizens Take Action
How Laws Are Made
Pollution
State and Federal Governments
The Purpose and Role of Governments
The Three Branches of Government
The U.S. National Anthem
Voting and Elections
What Are Taxes?
What Is Citizenship?

Economics

Earning, Saving, and Spending Money
Saving and Investing Money
Trade in Our Economy
What is an Economy?
What is the Stock Market?

Geography

Climate and Natural Resources in the United States
Communities and Cultures Around the World
Continents and Oceans
Cultures and People in North America
Geography and Human Settlements
Landforms and People
Latitude and Longitude
Maps and Globes
Regions of the United States
Regions of the United States: The Northeast
Regions of the United States: The Southeast

Regions of the United States: The Southwest
Regions of the United States: The West States and Capitals
Using a Globe
What is Culture?

US History

American Indian Nations of California
American Indian Nations of the Arctic
American Indian Nations of the Great Basin
American Indian Nations of the Northeast
American Indian Nations of the Northwest Coast
American Indian Nations of the Plains
American Indian Nations of the Plateau
American Indian Nations of the Southeast
American Indian Nations of the Southwest
American Indian Nations of the Subarctic
American Revolution: Battles and Outcomes
Causes of the American Revolution
Daily Life in the American Colonies
First and Second Continental Congress
Founders and Patriots
Frederick Douglass and Abraham Lincoln
Harriet Tubman and the Underground Railroad
Historical Documents of the American Revolution
Immigration to the United States (1789–1800)
Indigenous Culture
Leaders and Founders of North American Colonies
Martin Luther King, Jr.
Moving People and Goods in the 19th Century

Primary and Secondary Sources
Reconstruction After the Civil War
The Constitution of the United States: What Does it Say?
The Founding of St. Augustine, Florida
The Middle Passage and the North American Colonies
The Thirteen Colonies
Timelines
Two Cultures Meet: The Fur Trade in North America
United States Holidays
Westward Expansion and American Indian Nations
Westward Expansion of the United States
What Are the Articles of Confederation?
What is the Constitution of the United States?
What Is the Declaration of Independence?
What Was the American Revolution?
What Was the Civil War?
What was the Great Depression?
What Was the War of 1812?
Women and the American Revolution

World History

Explorers During the Age of Exploration
Inventions that Shaped European Exploration
The Aztec and Maya Civilizations
The First Human Migration 25,000 Years Ago
The Inca and Olmec Civilizations
The Triangular Trade
